2026 AMP Quality Benchmarks

Measure Name	Compliant Count	Eligible Count	Current Performance (%)	Percentile Rating	# to Reach 66th Percentile	25th Percentile	66th Percentile	90th Percentile
Asthma Medication Ratio : Total	-	-	n/a	n/a	0	81.00	87.00	91.00
Chlamydia Screening (Total)	1	2	50.00	66th-90th	-1	40.00	49.00	62.00
Childhood Immunization Status COMBO-10	10	29	34.48	10th-25th	5	37.00	50.00	71.00
Immunizations for Adolescents (Combo 2)	6	14	42.86	66th-90th	-1	26.00	36.00	46.00
Well-Child Visits in the First 15 Months	4	30	13.33	10th-25th	22	78.00	85.00	90.00
Well-Child Visits for Age 15 Months-30 Months	23	26	88.46	25th-66th	1	85.00	91.00	95.00
Child and Adolescent Well-Care Visits-Total	26	300	8.67	10th-25th	157	49.00	61.00	72.00

*Includes data up to 03/11/2026

Measurement Year (MY): The measurement year runs from January through December. It includes medical claims submitted through the end of March of the following year, allowing time for all services to be billed and processed before performance is calculated.

NCQA Benchmarks: The National Committee for Quality Assurance (NCQA) updates national performance benchmarks once a year, typically mid-year. The 50th percentile threshold (minimum performance level) may shift up or down based on how providers across the country performed during the prior year.

Compliant Count: This is the number of patients in your panel who have met all requirements for a given measure. It serves as the numerator (top number) in the equation used to calculate your performance percentage.

Child and Adolescent Well-Care Visits-Total	40	373	10.72	10th-25th	167	49.68	55.41	61.47	67.63

*Includes data up to 03/11/2026

Eligible Count: This is the total number of patients who qualify to be measured — meaning they meet the age, enrollment, and clinical criteria for the measure — regardless of whether they have completed the required care. It serves as the denominator (bottom number) in the performance percentage equation.

Percentile Rating: This shows how your performance compares to other providers nationally. Reaching the 50th percentile means you are performing at or better than half of providers across the country — this is the minimum performance target, or benchmark, to meet.

Number Needed to Reach a Specific Percentage: This field estimates how many additional patients would need to complete the required care for you to reach a target performance percentage. It's a practical planning tool to help prioritize outreach efforts.

Calendar Year-to-Date Performance: This is your current performance percentage, calculated by dividing the compliant count by the eligible count. It reflects the share of eligible patients who have received the required care so far this year. The higher the percentage, the better.

Measure Acronyms & Names: Each measure is identified by a standardized acronym and full name. The measures shown here are those prioritized either by the Integrated Healthcare Association (IHA) through the Achievement in Quality program (AMP), or by the California Department of Health Care Services (DHCS) through the Managed Care Accountability Set (MCAS).

Prior Month's Performance & % Change: This shows your performance percentage from last month's report alongside the change since then, helping you track whether your rate is improving, declining, or holding steady.
